TO WHOMSOEVER IT MAY CONCERN

Dt. 7 March 2006

This is to certify that we have procured a Hydrogen Purification System based on PSA (Pressure Swing Adsorption) technology from M/s New Multifab Engineers Pvt. Ltd., Mumbai, in the year 2005.

This purge gas recovery system has been designed to mainly remove methane from a H₂ rich stream.

The PSA system was commissioned in Sept 2005 and it has been running well. Based on our experience and interactions, we recommend Multifab Group and Mr. Dipak M Sheth for design, supply and troubleshooting of any adsorption system.
